## RENEWABLE ENERGY FOR AN ALTERNATIVE FUTURE

Sustainable Power Corp.

Fast Track Turnkey Projects ■ Full Scale Facility Creation ■ Plant Conversions

### The Power to Change the World

Sustainable Power Corp is an international green energy service provider, focused on all aspects of power generation ranging from feasibility studies, project financing, and new site design, to full scale implementation and turnkey plant construction. Sustainable Power Corp. is also the exclusive appointed representative to market the USSEC biofuel discovery within power plants worldwide, providing the most viable and cost efficient green energy solution available. SPC offers fast-track turnkey solutions that utilize one hundred percent renewable fuels without compromising cost or efficiency for both compliance and voluntary markets.

Sustainable Power Corp. includes senior management, team leaders, and board directors from numerous successful manufacturing groups and engineering companies, all working together to facilitate the most efficient green energy solutions exclusively utilizing the Rivera Process and its Green Energy attributes. Through strategic alliances with key manufacturers worldwide, we are able to also extend the most comprehensive range of equipment and component recommendations available – ensuring all turnkey projects incorporate best practices to fully serve tailored needs.
